Map Data Inset Out Area

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

<sup>1</sup> A " " following a place name indicates that the place is coterminous with a MCD. A " " indicates that the place is also a false MCD; the false MCD name is not shown.

<sup>2</sup> This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservations or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.

<sup>3</sup> A " " following a block number indicates that the block number is repeated elsewhere in the block.

Where international, state, and county boundaries coincide, the map shows the boundary symbol only for the highest-ranking of these boundaries.

A  $\square$  indicates a place name that is a place that is coextensive with a MCD. A  $\square$  indicates that the place is also a false MCD, the false MCD name is not shown.

This map shows tribal census tract boundaries and numbers within the subject entity. nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract that is defined within a federal government Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservations or off-reservation trust lands cross state or county boundaries, the same tribal census tract may cross state and county sides and boundaries, and, if not, it constitutes a single tribal census tract entity.

As follows, a block number indicates that the block number is reported elsewhere in the block.

<sup>1</sup> A \* \* following a place name indicates that the place is coextensive with a MCD; A ° ° indicates that the place is also a false MCD; the false MCD name is not shown.

1 A '\*' following a place name indicates that the place is coextensive with a MCD. A '^' indicates that the place is also a false MCD; the false MCD name is not shown.

2. This map shows tribal census tract boundaries and numbers within the subject entity. Tribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservation or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be used on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.

3 A \* \* following a block number indicates that the block number is repeated elsewhere in the block.
